

 INSPIRE-KENYA • YOUTH EVIDENCE TO POLICY LAB

12 Youth Advocacy Champions driving **sub-national change** across Kenya

An interactive portfolio of verified young leaders — spanning legal reform, GIS & spatial data, health communication, and grassroots mobilisation — turning frontline adolescent lived experience into evidence-based policy.

— WHO WE ARE

Authentic youth leadership, backed by multidisciplinary technical rigour

The Youth Evidence-to-Policy Digital Portfolio transforms static Word biographies into an interactive showcase of the INSPIRE-Kenya champion cohort. 75% of champions are aged 21–26, bridging frontline adolescent lived experience with legal, spatial GIS, and health expertise — so donors and county directorates can find — and fund — the exact evidence capacity they need.

Evidence, not anecdotes

Every profile carries verified age, county, academic background, and competency data — audited 12/12 under a strict zero-inference policy.

Lived experience to policy impact

Champions work where policy is made: county technical working groups, assemblies, and national ministries — translating research into reform.

Sub-national by design

From Nairobi's policy hub to the Lake Victoria basin and the coastal climate corridor, the cohort covers five operational counties.

THE TEAM

Meet the 12 champions

Search across names, counties, ages, institutions, and skills — or filter by thematic pillar. Open any profile for a deep-dive into competencies and affiliations.

WHY FUND THIS LAB

Donors don't fund lists of names — they fund capacity, evidence & scalability

Commission a technical sprint with the champions. Each engagement is scoped with CSA Kenya's lab focal points and delivered through county-anchored youth expertise.

Sub-national policy scorecards

County-level scorecards tracking adolescent health & SRHR policy commitments.

County youth TWG representation

Placed, prepared youth representation in county technical working groups.

Rapid surveys & GIS mapping

Grassroots data collection, spatial analysis, and evidence visualisation.
