

Agile Development Framework & Sprint Plan

Youth Evidence-to-Policy Digital Portfolio

Project: Youth Evidence-to-Policy Digital Portfolio (YAC Showcase)

Initiative: INSPIRE-Kenya Youth Evidence to Policy Lab

Organization: Centre for the Study of Adolescence (CSA Kenya)

Methodology: Agile Scrum (1-Week Prototype Sprint + 2-Week Production Hardening)

Lead Developer / Scrum Master: Osagiede Ryan Eromosele

Product Owner (Stakeholder): Rukia Nzibo (Partnerships, Communications & Advocacy Manager)

Domain SME / Content Coordinator: Sandra Washika (Project Assistant Youth Advocacy & COMMS Support)

1. Agile Framework & Ceremonies Overview

To transition from static Microsoft Word files to a responsive, donor-ready digital platform under tight timelines, we apply a lightweight, outcome-focused **Scrum** model.

+-----+ AGILE SPRINT CADENCE +-----+	
[Backlog Refinement]	----> Ingest 12 Word bios, audit missing ages/locations
[Sprint Planning]	----> Define Definition of Done (DoD) & commit user stories
[Daily Standups]	----> Daily progress sync, unblock data dependencies
[Sprint Review]	----> Working prototype demo to Rukia by Friday
[Retrospective]	----> Review donor usability, a11y compliance, phase next
+-----+	

Team Roles & RACI Matrix

Role / Team Member	Responsibility in Sprint	RACI
Osagiede Ryan Eromosele (Lead Dev)	Architecture, UI/UX, vector map engine, filtering,	R / A

	deployment	
Rukia Nzibo (Product Owner)	Vision sign-off, institutional brand alignment, Friday demo review	A / C
Sandra Washika (Data Focal Point)	Age verification, headshot collection, legal name accuracy	C / I
Bilateral Donors & County TWGs	End users: evidence retrieval, champion commissioning	I

R = Responsible, A = Accountable, C = Consulted, I = Informed

2. Epics & Thematic Value Streams

1. **EPIC-01: Sub-National Geographic Intelligence (Map & Telemetry)**
Goal: Enable regional health directors and donors to explore youth research footprint across high-burden Kenyan counties.
2. **EPIC-02: Scannable Talent & Competency Directory (Showcase Grid)**
Goal: Transform dry CV text into competency badges (GIS, KSL Sign Language, Policy Drafting) with instant search.
3. **EPIC-03: Evidence-to-Policy Deep Dives (Interactive Profiles)**
Goal: Provide complete academic, biographical, and organizational contexts via accessible modal windows.
4. **EPIC-04: Donor Conversion & Stakeholder Engagement (Action Engine)**
Goal: Direct calls-to-action allowing partners to commission policy briefs and export print-ready cohort dossiers.

3. Product Backlog & User Stories (with Story Points & Acceptance Criteria)

Estimation Scale: Modified Fibonacci (1, 2, 3, 5, 8 story points)

Sprint 1: Prototype Deliverable (Due Friday)

US-01: County Hotspot Vector Map

- **User Story:** *As a County Health Director or Donor, I want to click on operational Kenyan counties on an interactive map so that I can immediately filter champions working in my jurisdiction.*
- **Estimate:** 5 Story Points

- **Acceptance Criteria (AC):**
 - [x] Vector SVG map renders Kenya's boundaries with visible Lake Victoria & coastlines.
 - [x] Pulsing pins placed over Siaya, Kisumu, Homa Bay, Nairobi, and Kilifi.
 - [x] Clicking a pin smoothly filters the directory to display only that county's champions.
 - [x] County statistics update dynamically on hover/click.

US-02: Zero-Hallucination Verified Data Ingestion

- **User Story:** *As the Product Owner (Rukia), I need all champion data to reflect strictly verified facts so that CSA's institutional credibility is protected.*
- **Estimate:** 3 Story Points
- **Acceptance Criteria (AC):**
 - [x] 12/12 champions ingested into typed JSON (yacs.json).
 - [x] 100% verified chronological ages (21–33) and county bases mapped.
 - [x] Fallback UI (monogram avatars) active for profiles without official headshots.

US-03: Multi-Faceted Live Discovery & Filter Engine

- **User Story:** *As a Grant Reviewer, I want to search by technical keyword (e.g., "GIS", "Sign Language", "Policy") and toggle thematic pillars so that I can locate champions for specific funding calls.*
- **Estimate:** 3 Story Points
- **Acceptance Criteria (AC):**
 - [x] Real-time debounced search across names, academic degrees, roles, and skills.
 - [x] 6 pillar filter pills (SRHR, Data/GIS, Legal/Policy, Disability Inclusion, Media, Climate).
 - [x] Dynamic counter showing "Showing X of 12 Champions".
 - [x] Clear "Reset All" button when filters yield an empty or filtered state.

US-04: Deep-Dive Dossier Modal (A11y Compliant)

- **User Story:** *As a Partner Organization, I want to view full biographies, affiliations, and advocacy campaigns in a modal without navigating away from the page.*
- **Estimate:** 2 Story Points
- **Acceptance Criteria (AC):**
 - [x] Modal opens instantly on "View Dossier" click.
 - [x] Displays academic background, full narrative bio, skill matrix, and affiliations.
 - [x] Keyboard dismissible (Escape key) and accessible overlay lock.

US-05: Executive Action Drawer & Print Dossier Mode

- **User Story:** *As a CSA Executive, I want to print or save a clean cohort dossier so that I can bring branded one-pagers to donor pitch meetings.*
- **Estimate:** 2 Story Points
- **Acceptance Criteria (AC):**
 - [x] "Commission Evidence Sprint" modal pre-populating CSA focal contact channels.
 - [x] Print stylesheet (@media print) rendering clean, unclipped profile summaries.

4. Sprint Schedule & Burndown Architecture

+-----+	
DAY / DATE	AGILE ACTIVITIES & SPRINT GOALS
+-----+	
Day 1 (Monday)	Backlog grooming; extract 10 Word bios; identify data gaps; establish TypeScript data schema; acknowledge Rukia's brief.
+-----+	
Day 2 (Tuesday)	Ingest Irene Alma & Alvin Evelia (12/12 complete); audit confirmed counties; setup single-file HTML/Tailwind shell.
+-----+	
Day 3 (Wednesday)	Embed verified chronological ages (21–33); build Kenya SVG map component; wire bidirectional filter event emitters.
+-----+	
Day 4 (Thursday)	Align color scheme to CSA official portal (#002B49, #0090D0); run WCAG contrast checks; finalize responsive mobile view.
+-----+	
Day 5 (Friday)	Sprint Review Demo to Rukia; test edge cases; package deploy URL & GitHub repository for official handover.
+-----+	

5. Definition of Ready (DoR) & Definition of Done (DoD)

Definition of Ready (DoR)

A user story can only be brought into the active sprint backlog when:

1. The bio text has been parsed from primary project documents.
2. Personal details (age, legal name, county) are verified by Sandra/project records.
3. Acceptance criteria are measurable and testable on both mobile and desktop.

Definition of Done (DoD)

A story or component is marked "**Done**" only when:

1. Code passes clean rendering checks with zero console errors.
2. UI matches CSA Kenya's official brand palette (Deep Navy #002B49, Cyan #0090D0, Gold #E5A823).
3. Responsive design verified at 375px (mobile), 768px (tablet), and 1440px (desktop).
4. Accessibility: Keyboard navigable (Tab, Enter, Escape), aria attributes present.
5. All 12 champions render accurately with verified ages and operational counties.

6. Risk Register & Mitigation Strategy

Risk ID	Identified Risk	Impact	Probability	Mitigation Strategy
R-01	Missing photo headshots before Friday demo	Medium	High	Implemented: Built attractive dynamic monogram avatars with thematic gradient palettes that look intentional rather than broken.
R-02	Hallucinated or inferred demographic data	High	Low	Implemented: Enforced strict schema validation; unconfirmed data remained flagged until verified by Sandra.
R-03	Map distortion on mobile screens	Medium	Medium	Implemented: Wrapped SVG map in responsive viewBox container (0 0 600 680) with auto aspect-ratio scaling.
R-04	Donor disengagement from walls of text	High	Medium	Implemented: Condensed cards to 3 core skills and 1-line impact taglines,

				reserving full text for interactive modals.
--	--	--	--	---

7. Sprint Review Handover Protocol (Demo Script for Rukia)

When presenting the prototype on Friday, follow this 4-step demonstration flow:

- Step 1: Strategic Framing (30 seconds)**
"We took the 12 static Word bios and transformed them into an interactive evidence platform that demonstrates CSA Kenya's sub-national footprint to donors."
- Step 2: Interactive Regional Telemetry (1 minute)**
Show the Kenya map. Click Siaya, Kisumu, or Kilifi to showcase how the directory immediately reacts to geographic queries.
- Step 3: Competency & Skill Discovery (1 minute)**
Type "Sign Language" or "GIS" into the search bar, showing how partners can immediately pinpoint exact technical expertise.
- Step 4: Institutional Next Steps & Production Roadmap (30 seconds)**
Highlight Phase 2: uploading the official headshots once Sandra receives them and enabling direct PDF one-pager downloads.
